RE: Jr. Software Engineer

Dear Hiring Manager,

I am a highly-driven, detail-oriented professional with a computer science degree from the University of Massachusetts Boston and seeking a software engineer position with a company that will help me enhance my skills while I help your company fulfill their organizational goals.

Through both theoretical knowledge and hands-on experience gained through projects from a 12 weeks immersive Software Engineer bootcamp, I have developed the software engineering techniques and skill sets, such as Java, SQL, R programming, Python, JavaScript, JQuery, Django, HTML and CSS, Node, React, Ruby, and Ruby on Rails

I have a strong ability to work independently and on a team, as well as communicate with various stakeholders effectively and utilize strong problem solving skills to mitigate conflict. I'm passionate about software engineering, because growing up in Africa, I saw that computers can change our lives and businesses for the better.

I am contacting you to inquire about the position that was listed on Jopwell. I'm positive I can become a valuable asset to your company. I am driven and willing to place my best foot forward to accomplish any task given to me. I hope to hear from you in the near future and thank you for taking the time to read this letter. If you have any questions or concerns please do not hesitate to contact me.

Sincerely,

Wilson Kameni
